Take Control

of your electricity usage with the OWL range of products.

OWL Standard Sensor   OWL Large Sensor

OWL Wireless Electricity Monitor (CM119)

is the original, portable wireless electricity monitor. It's designed to help you save money,electricity and the environment. **OWL** features a NEW cumulative memory function making it easier than ever to monitor electricity usage.

The **OWL** provides up to the second information on the amount of electricity you are using in terms of power, cost and your carbon footprint. This means you can see in real time the benefits of turning off electrical devices at home. Whether it's turning off at the plug rather than just using standby, or simply turning off a light, **OWL** shows you the cash impact of changing your habits and behaviours which could amount to savings of hundreds of pounds per year.

OWL comprises three elements:- the sensor, the transmitter and the display unit. Installation is safe, quick and easy, with no electrical knowledge required. Batteries *are* included.

OWL Wireless Electricity Monitor contains everything you need for a standard single phase domestic installation. For 3-phase installations you will need additional sensors. For cable widths up to 10mm you will need to purchase two additional standard sensors.For larger installations such as large houses or light industrial property, with cable widths over 10mm and up to 17mm you will need to purchase three additional large sensors, as the standard sensor will not fit.

What's In The Box: 1x Transmitter, 1x Display, 1x Standard Sensor, Batteries and User Manual.

Owl USB Connect (CM120)

turns your Windows PC into a sophisticated real-time electricity monitoring system. The **OWL USB Connect** works with your **Owl Wireless Electricity Monitor** 113 and 119 and your computer. Simply plug the USB into your PC and the information from your **Owl Electricity Monitor** will be transmitted to your PC enabling you to track your progress in saving money.

The **OWL USB Connect** will enable you to review your electricity usage from the **OWL Wireless Monitor**, graphically view/plot your electricity usage and compare your electricity usage week by week, month by month.

The software provides the facility to export the stored data as a comma separated variable (.csv) file for independent analysis.

*Please note that the **USB Connect** receiver contains no internal memory or power supply. It is powered directly via the USB socket and the software will record received data on your PC whilst the programme is running.* Compatible with Windows XP and Vista.

What's In The Box: USB Receiver, USB Cable and CD.
